

# Bloomtastic 8-32-5

with Slow Release Methylene Urea Nitrogen plus Micros

- **No Chlorides**
- **Safe For Seedlings & Young Plants**
- **Slow Release Nitrogen**
- **No Sulfur**
- **Complete Micro Package**
- **Low Salt Index**

### Guaranteed Analysis:

Total Nitrogen (N)	.8%
1% Urea Nitrogen	
3% Ammoniacal Nitrogen	
4% Slowly Available Water Soluble Nitrogen*	
Available Phosphate (P <sub>2</sub> O <sub>5</sub> )	.32%
Soluble Potash (K <sub>2</sub> O)	.5%
Boron (B)	.002%
Copper (Cu)	.005%
0.05% Chelated Copper (Cu)	
Iron (Fe)	.01%
0.1% Chelated Iron (Fe)	
Manganese (Mn)	.005%
0.05% Chelated Manganese (Mn)	
Molybdenum (Mo)	.0005%
Zinc (Zn)	.005%
0.05% Chelated Zinc (Zn)	

Derived From: Urea, Methylene Urea, Potassium Carbonate, Polyammonium Phosphate, Phosphoric Acid, Copper EDTA Chelate, Iron EDTA Chelate, Manganese EDTA Chelate, Zinc EDTA Chelate, Sodium Molybdenum, Boric Acid. Chelating Agent: EDTA

\*4% slowly available Nitrogen from Methylene Urea

Weight per gallon: .11.45 lbs.

Potential acidity equivalent to 746 lbs. Calcium Carbonate per ton.

8-32-5 EC Readings				
Nitrogen PPM	EC (mmhos/cm)		Nitrogen PPM	EC (mmhos/cm)
25	0.15		200	1.22
50	0.30		300	1.83
75	0.46		400	2.44
100	0.61		500	3.05

### Product Description:

8-32-5 is perfect as a high phosphorus plant starter. 8-32-5 is excellent for seedlings, young plants and over-seeding. The solution contains 4% slow release nitrogen from our exclusive methylene urea. The slow release nitrogen helps to feed young plants consistently, avoiding flush growth which can be detrimental and contribute to disease susceptibility. Methylene urea is known to be a very consistent and reliable nitrogen source that remains present and available to your plants

for a longer period of time. Methylene urea is not easily broken down, and its nitrogen will only be released by a combination of factors (heat, humidity, and microbial activity). The phosphorus and potassium are completely soluble and therefore immediately available for plant uptake. You can use less 8-32-5 than granular high phosphorus products since there is no need to wait for particle breakdown. 8-32-5 contains no chlorides, therefore making it safer to tender plants.

# Bloomtastic 8-32-5

with Slow Release Methylene Urea Nitrogen plus Micros

8-32-5								
Fluid Ounces Of 8-32-5 Per Gallon Of Water								
PPM Phosphorus:	25	50	75	100	150	200	300	400
PPM Nitrogen:	6	13	19	25	38	50	75	100
1:500	3.64	7.28	10.92	14.56	21.83	29.11	43.67	58.22
1:300	2.18	4.37	6.55	8.73	13.10	17.47	26.20	34.93
1:200	1.46	2.91	4.37	5.82	8.73	11.64	17.47	23.29
1:100	0.73	1.46	2.18	2.91	4.37	5.82	8.73	11.64
1:50	0.36	0.73	1.09	1.46	2.18	2.91	4.37	5.82
1:15 Ratio for Hozon Proportioner								
1:15	0.11	0.22	0.33	0.44	0.66	0.87	1.31	N/A

## Application Recommendations:

8-32-5 needs no mixing and will not settle out of solution. Like all Growth Products, it is ideal for any type of fertigation system, drip irrigation or spray equipment. Use 8-32-5 on all types of bedding plants, perennials, cut flowers, plugs, ornamentals, nursery crops, trees, foliage and container plants.

**Direct Siphon:** 8-32-5 can be siphoned directly from the original container. This can be done with a variable proportioner that can be set to high ratios. This eliminates the need to mix stock concentrates or stir the mixing barrels. For 100 PPM phosphorus, set injector to 1:4400; for 200 PPM, set injector to 1:2200.

**Parts Per Million:** Use the *Parts Per Million* chart to choose desired phosphorus ratio.

**Drench:** Use the *Drench Rates* chart in order to calculate application by specific number of pots. Ideal for field grown and containerized nursery stock as an alternative to top dressing with granulars.

Drench Rates For Containers 100 Gallon Tank	Low	High
	(Sensitive Plants)	(Nursery Stock & Foliage)
Desired Phosphorus / Cubic Yard	1/3 P	1/2 P
Gallons 8-32-5 Per 100 Gal. Tank	0.42	0.62

Drench Rate Per Container		
Pot Size	Tank Mix Applied Per Pot	Number Of Pots Per 100 Gallon Tank Mix
4"	2 fl. oz.	6400
5"	3.5 fl. oz.	3657
6"	6.2 fl. oz.	2065
1 Gal.	9.3 fl. oz.	1376
2 Gal.	20 fl. oz.	640
3 Gal.	35 fl. oz.	366

**Foliar Feeding:** When using overhead irrigation, 8-32-5 gives you dual efficiency since the nutrients will be absorbed by both the leaves and roots. For tender plants and greenhouse foliar spray applications use one-half the rate (PPM) you would normally use for drip irrigation feeding. Foliar feeding should not be used when plants are in bloom.

**Hand Watering:** Mix 1/2 to 3/4 teaspoon 8-32-5 per gallon of water. Saturate soil with mix.

**How to Extend Feedings:** Depending on crop species, temperature and soil composition you can extend the timings in-between fertilization due to the slow release nitrogen. In order to assure plants are receiving adequate nutrient levels electrical conductivity (EC) reading should be taken immediately after fertilizer is applied and then at 7 day intervals. By tracking the EC reading you can establish a nutrient release curve for your specific growing conditions and crops.

## Storage & Handling:

**Storage:** All Growth Products horticultural fertilizers can be stored in normal warehouse areas. 8-32-5 has an acidic pH. Always store in original container and keep sealed.

**Mixing:** 8-32-5 is compatible with other technical chemicals including fungicides and insecticides and can be mixed and sprayed in one application.
