PRODUCT DESCRIPTION:

Iron Max 6% is a chelated iron and manganese chelate that promotes fast green up. Iron Max 6% plus 2% Manganese is important for good green color, (chlorophyll synthesis) and for photosynthesis. Iron Max 6% is 100% chelated. It is a clear solution that will not settle. Iron Max 6% provides the plant with immediately available iron/ manganese along with nitrogen for correction of iron chlorosis. Iron Max 6% is amine compatible and can be used with insecticides, herbicides and fungicides. Iron Max 6% can be used for regular turf maintenance to enhance rich green color and promote strong root systems in high traffic areas and stress conditions. It is ideal for use on turf, trees and ornamentals, for general plant maintenance and correct chlorosis. Iron Max 6% can be applied to warm, cool and transitional grasses throughout the growing season.

MIXING:

Add water to tank mix leaving enough room to add other products. Add Iron Max and agitate. Add other products in this order: 1. urea and other N-P-K fertilizers, 2. pesticides and fungicides, 3. add herbicides last. Agitate between each addition. Use all of the tank mix a few hours after mixing. Do not leave overnight. Be sure to agitate before spraying. Never add concentrates together.

STORAGE & HANDLING:

Iron Max 6% as a concentrate is corrosive and should be stored in its original container. Store in a cool place with the cap tightly closed. Do not apply to any area not specified on label. Avoid contact with unfinished wood products, painted surfaces or concrete as this product may cause staining.

CAUTION: Keep out of reach of children. In case of contact with eyes, flush immediately with copious amounts of water. Contact a physician. Do not take internally.
