FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF WASHINGTON

DREXEL DIURON 4L HERBICIDE

EPA REG. NO. 19713-36

EPA SLN NO. WA-000034

SUPPLEMENTAL LABELING

DREXEL DIURON 4L HERBICIDE (diuron) is a state restricted use pesticide for the protection of ground-water and may be distributed only by licensed pesticide dealers. Only certified applicators or persons under the direct supervision of a certified applicator may apply DREXEL DIURON 4L HERBICIDE (diuron).

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This labeling must be in the possession of the user at the time of application.

Follow all applicable directions, restrictions, Worker Protection Standard requirements and precautions on the EPA registered label.

DIRECTIONS FOR USE

For control of weeds and seedling grasses in established stands of Perennial ryegrass grown for seed.

GENERAL INFORMATION

Apply this product only to well-established, vigorous stands of Perennial ryegrass as directed below. Use sufficient water, a minimum of 25 gallons per acre, for thorough coverage of weed foliage. For best results, make application at the onset of Fall rains and before weeds become established (typically October 1 through November 15). Weeds beyond the 2 to 4 leaf stage will usually not be controlled. Use higher rates within the range listed when treating larger weeds and heavier weed infestation. Weed control may be reduced where straw residues have accumulated on the soil surface. Lack of moisture to activate the herbicide may reduce weed control. Tank mixtures or sequential treatment with other herbicides may reduce crop tolerance and increase risk of crop injury. When using this product in a tank mix or sequential treatment with other pesticides, do not use the maximum rates listed below unless compatibility and the potential for phytotoxicity have been evaluated. Crop tolerance may be reduced and the likelihood of crop injury may increase when crop is under stress caused by weather, diseases and insects.

Apply this product in the Fall at the rate of 2 to 4 pints per acre.

RESTRICTIONS

For use under this SLN label do not apply this product through any type of irrigation system.

This label for DREXEL DIURON 4L HERBICIDE expires and must not be distributed or used in accordance with this SLN registration after December 31, 2005.
