

SUPPLEMENTAL LABELING

Drexel

Diuron 4L
Herbicide

EPA Reg. No. 19713-36

All applicable directions, restrictions and precautions on the EPA registered label are to be followed. This label must be in the possession of the actual product user at the time of application.

DIRECTIONS FOR USE

GRAPES: Apply only to established vineyards (at least 3 years old) as a band treatment to Grape rows. On soils low in clay or organic matter (1 to 2%), severe plant injury may result if heavy rainfall or more than one inch of irrigation occurs soon after treatment. This risk must be assumed by the user.

West of the Rocky Mountains—Apply during the Winter months when weeds are less than 2 inches in height or diameter. For initial treatment, apply 4½ to 6 pints per acre; subsequent annual applications of 3 pints per acre will usually give adequate weed control. Do not apply to vines with trunks less than 1½ inches in diameter, as injury may result.
