GENERAL INFORMATION

LineMaster™ SW provides a state-of-the-art line cleaner that keeps your irrigation system free flowing. This unique combination of organic dispersant polymers coupled with the long chain linear polyphosphates keeps mineral deposits in solution, thereby preventing biological contamination from attaching to the system.

LineMaster™ SW helps saline soils and also mineral rich soils and waters. It offers a new measure of control by allowing irrigation water to penetrate through compacted soils that have mineral deposits. It modifies soil structure by removing mineral deposit blockage and allowing the soil to absorb the water and increase pore space.

DIRECTIONS FOR USE

LineMaster™ SW is normally applied at a low dosage each time the irrigation system is run. The normal dosage is from 1 to 2 ppm, which is equivalent to 1/3 to 2/3 gallon per acre-foot of water applied (not to exceed 4 ppm in a single application). The quality of feed water will determine the exact amount of feed rate.

When feeding fertilizers into the system, **always jar test to check for compatibility** of the products before mixing and injecting into the system.

USE ONLY AS DIRECTED KEEP FROM FREEZING

Benefits:

- **Maintains irrigation systems at design potential**
- **Reduces maintenance costs**
- **New dispersant dissolves scale and other deposits**
- **Increases water penetration**
- **Removes mineral deposits that clog emitters**
- **Environmentally sound and low cost per acre**

CAUTION:

KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Avoid breathing spray mist. May cause irritation of nose, throat or skin. Avoid contact with eyes, skin and clothing. Do not contaminate feed and foodstuffs. Do not apply to any area not specified on label. Do not re-use empty container. Wash thoroughly with water and detergent. Puncture, make un-useable, dispose of in a safe place. Store out of sun in an area of moderate temperature. Will stain when applied to concrete.

Non-Plant Food

Active Ingredients

Polymaleic anhydride anionic terpolymer.....	21.0%
Linear long chain polyphosphate.....	14.5%
Citric acid/copper sulfate pentahydrate.....	4.5%
Inert ingredients.....	60.0%
Total.....	100%

Net Contents: 5 gallons
9.66 lbs/gal @68°F

This product is manufactured and distributed by:

STATEMENT OF PRACTICAL TREATMENT

If in eyes: Flush with plenty of water for fifteen minutes, then get medical attention.

If on skin: Remove contaminated clothing. Wash skin with soap and water. Get medical attention if irritation persists.

If swallowed: First aid is not normally required. If digestive tract irritation develops, get medical attention.

If inhaled: Remove victim to fresh air; apply artificial respiration if necessary.

Solubilizes Minerals.

LineMaster™ SW hold large concentrations of calcium carbonates in solution. **LineMaster™ SW** keeps sprinkler nozzles from plugging when applying phosphate fertilizers and keeps minerals from forming on fruit. **LineMaster™ SW** keeps sprinkler nozzles from plugging when applying phosphate fertilizers and keeps minerals from forming on fruit.
