CONDITIONS OF SALE AND WARRANTY

Monterey Chemical Company warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated when used in accordance with the use directions under normal conditions. Monterey Chemical Company neither makes, nor authorizes any agent or representative to make, any other warranties, express or implied, including fitness or merchantability.

The directions for use of this product are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks inherently associated with use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as timing and method of application, weather and crop conditions, presence of other materials, or other influencing factors, all of which are beyond the control of Monterey Chemical Company and Seller. Buyer and user acknowledge and assume all risks and liability resulting from the handling and use of this material not in strict accordance with directions given herewith. In no case shall Monterey Chemical Company or the Seller be liable for consequential, special, indirect, or incidental damages or losses resulting from the handling or use of this product. The foregoing is a condition of sale by Monterey Chemical Company and is accepted as such by the Buyer.

DIRECTIONS FOR USE

MONTEREY CROP-WHITE is designed specifically for sunburn protection of fruit, nuts and foliage of a variety of crops.

MIXING: Fill the mix tank $\frac{1}{2}$ full of water, start mechanical agitator, add recommended amount of MONTEREY CROP-WHITE and finish filling tank. Continue agitating solution until thoroughly mixed.

Depending on crop conditions, the addition of an adhesive / sticker, such as Organic Adhesive Adjuvant or S-K-H Agricultural Adhesive, may be beneficial. Follow the use directions of the adjuvant.

APPLICATION: MONTEREY CROP-WHITE may be applied by either ground or aerial application equipment. Good coverage is essential for adequate sunburn protection.

NOTE: When applied shortly before harvest, MONTEREY CROP-WHITE may leave a white residue that may be undesirable for fresh-market fruits and vegetables.

Avocados and Citrus - Mix 80-100 lbs. MONTEREY CROP-WHITE per 100 gallons water and apply 100-150 gallons finished spray per acre, depending on tree size.

Deciduous Fruit Trees and Vines, including Apricots, Cherries, Grapes, Nectarines, Peaches, Plums, Prunes, etc. - Mix 20-25 lbs. MONTEREY CROP-WHITE per 100 gallons water and apply 100-400 gallons finished spray per acre, depending on tree size.

Vegetable and Row Crops, including Melons, Onions, Peppers, Tomatoes, etc. - Mix 80-100 lbs. MONTEREY CROP-WHITE per 100 gallons water and apply 80-150 gallons finished spray per acre.

Walnuts - Mix 100 lbs. MONTEREY CROP-WHITE per 100 gallons water and apply 120-500 gallons finished spray per acre, depending on tree size.
